Description	The ACOPOS servo drive family is an important component of the complete automation solutions provided by B&R. Industry-specific functions and intuitive tools form the basis for short development times. An important criteria for the performance of an automation solution is fast and precise reactions to events handled in the application or to immediate changes in the production process. Therefore, ACOPOS servo drives work with very short scan times and communication cycles of 400 μs, which only amount to 50 μs in the control loop.
