Product Description

Product Description

FOXBORO FCM2F2 P0914YZ FIBER OPTIC FIELDBUS EXTENDER

2mbps FCMs are fiber optic communications extenders that permit 200 Series FBMs to be installed remotely and closely to the plant processes. The three versions, FCM2F2 (RH914YZ), FCM2F4 (RH917JA), and FCM2F10 (RH916TQ), offer nominally maximum baseplate-to-baseplate fiber optic cabling distances: up to 2 km (1.24 mi), up to 4 km (2.48 mi), and up to 10 km (6.21 mi), respectively. The FCMs are mounted on standard baseplates in pairs for redundancy. Nonredundant configurations require only a single FCM. Unaffected by electrical noise (EMI, RFI, and lightning), fiber optic cabling provides a versatile means of extending signal communications. It can be used in areas containing rotating machinery, arc welders, and so forth, and can be installed in cable trays containing high voltage power lines, or in outdoor areas exposed to lightning hazards. Its electrical isolation characteristics provide protection from voltage differentials and ground loops.

Technical Application

- 1.Power industry, the elevator industry, parking, automobile, auto ancillary.
- 2.feed industry, aluminum smelting machines, refrigeration industry.
- 3.steel industry, combustion control systems, non-ferrous metal smelting.
- 4.glass industry, construction machinery, textile machinery, water treatment
